

## Quantity Limits

Quantity Limits are applied to certain drugs based on the approved dosing limits established during the FDA approval process. Quantity limits are applied to the number of units dispensed for each prescription. If your health plan has a Quantity Limit for a specific drug, your physician must submit a request form to the health plan for approval **ONLY** if the dose exceeds the established Quantity Limit. If the request is not approved, please remember that you always have the option to purchase the medication at your own expense.
